Oya History Museum

History of Oya Rock Mining and Giant Underground Quarry

The exhibition hall displays materials related to the hand-mining tools, excavation methods and types of transportation used when excavation was in full swing, from the mid-Edo Period up until 1959. The highlight is the remains of the underground excavation site. This cavernous area goes down 30~60 meters and covers a voluminous underground space of 20000m³, while the mine shaft has an average temperature of around 8°C. Some ten million rocks have been excavated from this gigantic underground quarry.
